

# STEMLAB & BMTSERVE SYSTEM REQUIREMENTS

## COMPATIBLE SOFTWARE ENVIRONMENT

SERVER OPERATING SYSTEMS	RELATIONAL DATABASE MANAGEMENT SYSTEMS	CLIENT OPERATING SYSTEMS
Windows Server 2003 & 2008	<ul style="list-style-type: none"> <li>Microsoft® SQL Server 2005, 2008</li> <li>Oracle® 9i, 10g &amp; 11g</li> </ul>	Microsoft® Windows 2000, XP & 7

STEMSOFT supports our products running on the above operating systems including those deployed within a VMware™ Virtualized Infrastructure.

## RDBMS SERVER HARDWARE RECOMMENDATIONS

<b>CPU</b>	Dual Core Intel® Xeon®, 2.4 GHz (or equivalent)
<b>RAM</b>	4 GB (or higher)

## CLIENT HARDWARE RECOMMENDATIONS

<b>CPU</b>	Dual Core Intel® 2.0 GHz (or equivalent)
<b>RAM</b>	1 GB (or higher)

## OTHER INFORMATION

- The amount of disk space required for the application is under 1GB.
- The initial size of the empty database is under 500MB. Growth rate is approx 2MB per patient. Growth rate will vary depending on the number of interfaces and attachments.
- STEMSOFT supports Active Directory Authentication for SQL Server – however it should be noted that the instance of SQL Server MUST be set to Windows Only Authentication.

Requirements including security, remote access, number of users, and expected database size should be taken into consideration before allocating hardware to your unique deployment.
