

# BMTBASE™ SYSTEM REQUIREMENTS

## COMPATIBLE SOFTWARE ENVIRONMENT

SERVER OPERATING SYSTEMS	RELATIONAL DATABASE MANAGEMENT SYSTEMS	WEB BROWSER (CLIENT)
<ul style="list-style-type: none"> <li>Windows Server 2003 R2</li> <li>Small Business Server 2003 R2</li> <li>Windows® XP Pro SP3</li> </ul>	<ul style="list-style-type: none"> <li>Microsoft® SQL Server 2005</li> <li>Oracle® 9i, 10g</li> </ul>	<ul style="list-style-type: none"> <li>Microsoft® Internet Explorer 7</li> <li>Microsoft® Office Excel</li> </ul>

STEMSOFT supports our products running on the above operating systems including those deployed within a VMware™ Virtualized Infrastructure.

## SERVER HARDWARE RECOMMENDATIONS

<b>CPU</b>	Dual Core Intel® Xeon®, 2.4 GHz (or equivalent)
<b>RAM</b>	4 GB (or higher)
<b>OPERATING SYSTEM</b>	Windows Server® 2003 R2, Standard Edition

## OTHER INFORMATION

- The amount of Disk Space required for the application is under 1 GB
- The initial size of the empty database is approx 500MB. Growth rate is approx 100KB per patient, per year
- The minimum recommended number of Client Access Licenses required by the STEMSOFT applications is four
- The Server OS must support .NET 3.5 SP2
- IIS version 6 is required
- You can choose to run the ASP.NET application on the database server, OR on a separate application server, with network access to the database server - Both configuration options are fully supported

Requirements including security, remote access, number of users, and expected database size should be taken into consideration before allocating hardware to your unique deployment.
