

The Complete Turnkey Solution for Cord Blood Banks

BioE and StemSoft are pleased to provide cord blood banks a complete, quality-driven turnkey solution for comprehensive cord blood processing and data management. The PrepaCyte[®]-CB/StemLab[®] solution ensures process standardization by guiding the user through the pre-defined, BioE approved PrepaCyte-CB standard procedure template with complete lot-to-lot traceability, ISBT labeling and freezing inventory tracking from within StemLab.

PrepaCyte-CB

The simple solution for cord blood processing

- Clinically Proven Processing System
- High Recovery of Clinically Important Cells
- Efficient and Consistent Cord Blood Processing

- Industry Leading Informatics Solution
- Complete Product Lot-to-Lot Traceability
- ISBT 128 Identifiers and Label Generation

- Quick Implementation
- Increased Operational Efficiency
- Outcome Reporting
- Heightened Quality Control
- Assists with Regulatory Compliance

You have the solution, now unlock your lab's full potential
