

# STEMLAB & BMTSERVE SYSTEM REQUIREMENTS

STEMSOFT Software strongly recommends that you discuss your unique deployment requirements with a STEMSOFT Representative before any hardware or software purchase. Requirements including security, remote access, number of users, and expected database size should be taken into consideration before allocating hardware to your unique deployment.

## SUPPORTED SOFTWARE ENVIRONMENT

SERVER OPERATING SYSTEMS	RELATIONAL DATABASE MANAGEMENT SYSTEMS	CLIENT OPERATING SYSTEMS
<ul style="list-style-type: none"> <li>Windows Server 2000, 2003</li> </ul>	<ul style="list-style-type: none"> <li>Microsoft® SQL Server 2000, 2005</li> <li>Oracle® 9i, 10g</li> </ul>	<ul style="list-style-type: none"> <li>Microsoft® Windows 2000, XP</li> </ul>

## SERVER HARDWARE RECOMMENDATIONS

<b>CPU</b>	Dual Core Intel® Xeon®, 2.4 GHz (or equivalent)
<b>RAM</b>	4 GB (or higher)
<b>OPERATING SYSTEM</b>	Windows Server® 2003 R2, Standard Edition

## CLIENT HARDWARE RECOMMENDATIONS

<b>CPU</b>	Dual Core Intel® 2.0 GHz (or equivalent)
<b>RAM</b>	1 GB (or higher)
<b>OPERATING SYSTEM</b>	Microsoft ® Windows XP SP3

## OTHER INFORMATION

- VMware Server ESXi v3 has been tested and is a supported platform
- The amount of Disk Space required for the application is under 1 GB
- The initial size of the empty database is approx 500MB. Growth rate is approx 2MB per patient
- STEMSOFT supports NT/Active Directory authentication for SQL Server – however it should be noted that your instance of SQL Server MUST be set to Windows Only Authentication for this to work.
