

BMTBASE™ SYSTEM REQUIREMENTS

STEMSOFT Software strongly recommends that you discuss your unique deployment requirements with a STEMSOFT Representative before any hardware or software purchase. Requirements including security, remote access, number of users, and expected database size should be taken into consideration before allocating hardware to your unique deployment.

SUPPORTED SOFTWARE ENVIRONMENT

SERVER OPERATING SYSTEMS	RELATIONAL DATABASE MANAGEMENT SYSTEMS	WEB BROWSER (CLIENT)
<ul style="list-style-type: none"> Windows Server 2003 R2 Small Business Server 2003 R2 Windows® XP Pro SP3 	<ul style="list-style-type: none"> Microsoft® SQL Server 2005 Oracle® 9i, 10g 	<ul style="list-style-type: none"> Microsoft® Internet Explorer 7 Microsoft® Office Excel

- The minimum recommended number of Client Access Licenses required by the STEMSOFT applications is four
- The Server OS must support .NET 3.5
- IIS version 6 is required
- You can choose to run the ASP.NET application on the database server, OR on a separate application server, with network access to the database server - Both configuration options are fully supported

SERVER HARDWARE RECOMMENDATIONS

CPU	Dual Core Intel® Xeon®, 2.4 GHz (or equivalent)
RAM	4 GB (or higher)
OPERATING SYSTEM	Windows Server® 2003 R2, Standard Edition

OTHER INFORMATION

- VMWare Server 1.0.8 and VMWare Player v2.0.0 have been tested and are supported platforms
- The amount of Disk Space required for the application is under 1 GB
- The initial size of the empty database is approx 500MB. Growth rate is approx 100KB per patient, per year

* System requirements are subject to change
